Summary

Results-driven engineer with expertise in software engineering, modernizing legacy systems, and developing full-stack, mobile, cloud and web applications.

Education

- | | |
|---|--|
| M.S. University of Maryland Global Campus , Cybersecurity Technology
• Concentration in Cyber Operations and Cloud Security. | Adelphi, MD
Aug 2026 – present |
| B.S. Indiana State University , Computer Technology
• Minor in Electronics Technology. | Terre Haute, IN
Jan 2021 – Aug 2025 |

Experience

- | | |
|--|---|
| Freelance , Full-Stack Developer
• Design and build scalable full-stack applications end-to-end (API through cloud deployment) using JavaScript/TypeScript, React, Vue.js, Node.js, and Flutter/React Native.
• Design, document, and maintain RESTful APIs with authentication, versioning, and structured error handling; apply automated testing, source control, and code review across projects. | Indianapolis, IN
Jan 2015 – present
11 years 8 months |
| FedEx , Material Handler Operations & Technical Support
• Progressed from temporary staffing into a full Material Handler Operations & Technical Support role, supporting Non-Con and Manuals diverter operations and contributing to the rollout of the Damaged Package Tool (DPT) and Quality of Loading (QoL) initiative across International and Domestic departments. | Indianapolis, IN
Feb 2025 – present
1 year 7 months |
| Nov'act Council , Application Developer Intern
• Architected and deployed a mobile data-collection app (Project MA CACAOYERE) using KoboToolbox and ODK, Docker, Flutter, Firebase and Supabase; defined data schemas and led end-to-end testing, earning a commendation from the General Director. | Abidjan, Côte d'Ivoire
May 2024 – Aug 2024
4 months |

Projects

- | | |
|--|---------------------|
| Sii-Kaa.com ↗
Maintain a database backed cloud data stream live production system. (FinTech)
• A cross-platform currency exchange application. Tracks over 170+ world currencies in real time, with a focus on global exchange rates underserved by mainstream financial tools. Built by Flutter, Dart, and JavaScript. Deployed on Firebase and GCP. | Jan 2025 – present |
| Harmattan ↗
Climate study and analysis tool for the Harmattan season in West Africa. (Climate Science)
• Structured by semantic HTML. Layout, theming, animations, and language switch all run on pure CSS, the application provides a user-friendly interface for visualizing and analyzing climate data. | July 2026 – present |

Skills

Languages: JavaScript, TypeScript, Python, Java, Dart, Swift/Kotlin, SQL, HTML, CSS, Bash, zsh, shell, C/C++, C#, PHP.
Frameworks: Angular, Vue.js, Django, Next.js, Flutter, React Native/Expo, Tailwind CSS, Node.js, .NET, Laravel.
Infrastructure: Azure, Github, CD/CI, Docker, RESTful API, Firebase, Supabase, KoboToolbox, ODK, Kubernetes, AWS, GCP.
Abilities: Skilled across the full SDLC, design, coding, testing, deployment, and maintenance. Including Web, Mobile, and Cloud applications. Experienced in Agile and Scrum methodologies, with a strong focus on delivering high-quality software solutions. Bilingual (English/French); cross-cultural collaboration across English and French speaker teams.
