

Koidio Y. Blé

Software Engineer | Flutter, Firebase, Mobile, Web & Cloud Applications

📍 Indianapolis, IN ✉ koidioble@gmail.com ☎ (463) 256-9250 🔗 koidioble.com 🌐 koidioyble 🔄 koidioble

Summary

Software engineer with experience designing, building, testing, and deploying cross-platform mobile, web, and cloud applications. Skilled in Flutter, Dart, JavaScript/TypeScript, Firebase, REST APIs, Git, debugging, and user-centered software delivery. Brings application-development, technical support, and embedded-systems experience, with a focus on reliable and maintainable software solutions.

Skills

Languages: Dart, JavaScript, TypeScript, Python, Java, SQL, HTML, CSS.

Application Development: Flutter, Firebase, REST APIs, Authentication, Data Modeling, Responsive Web Development.

Cloud and DevOps: Firebase Hosting, Google Cloud Platform, Git, GitHub, Docker, Deployment, CI/CD Fundamentals.

Engineering: Object-Oriented Programming, Debugging, Testing, API Integration, Software Development Life Cycle, Agile/Scrum.

Languages: English and French.

Experience

Nov'act Council, Application Developer Intern

Abidjan, Côte d'Ivoire

- Architected and deployed a mobile data-collection application for Project MA CACAOYERE using KoboToolbox, ODK, Docker, Flutter, Firebase, and Supabase.
- Defined application data schemas and supported end-to-end testing for field data collection and operational reporting.
- Delivered a field-ready solution recognized by the General Director for technical quality and implementation support.

May 2024 – Aug 2024
4 months

Master Computer System, Computer Engineer

Abidjan, Côte d'Ivoire

- Diagnosed and resolved hardware, software, systems, and network issues for business users, reducing operational disruption.
- Designed, documented, and executed preventive-maintenance procedures to improve computer-system reliability.
- Built, tested, and deployed embedded application prototypes on custom hardware.
- Communicated technical findings and solutions to users and stakeholders.

May 2010 – Aug 2017
7 years 4 months

Projects

[Sii-Kaa](#) 

Jan 2025 – present

Cross-platform currency-exchange application providing real-time exchange-rate information.

- Built and deployed a Flutter application using Dart, JavaScript, Firebase, and Google Cloud Platform.
- Developed currency-conversion and exchange-rate features covering more than 170 global currencies.
- Maintain the live web application, cloud deployment workflow, and ongoing feature improvements.

[Harmattan](#)  | [GitHub](#) 

July 2026 – present

Climate-study and analysis web application focused on the Harmattan season in West Africa.

- Built a responsive web interface using semantic HTML, CSS, animations, theming, and client-side multilingual functionality.
- Designed an accessible experience that helps users explore and interpret climate-related information.

Education

M.S. **Marian University**, Engineering Management

Indianapolis, IN

- Admitted to the Master of Science in Engineering Management program.

Admitted — Expected Start
Spring 2027

B.S. **Indiana State University**, Computer Engineering Technology

Terre Haute, IN

- Minor in Electronics Technology.

Completed August 2025

Additional Experience

FedEx, Material Handler

Indianapolis, IN

Feb 2025 – present
